

# 2017 STANSW EVENTS – SAVE THE DATE

**March 24**

## **BEESSST Conference – University of NSW**

The BEESSST conference combines Biology, Earth & Environmental and Senior Science for Teachers. While the focus will be on Stage 6, all 7-10 teachers could also benefit from the carefully selected mix of upgrades on subject knowledge as well as ideas on programming and related assessment to improve student outcomes. In 2017 the focus will be around implementation of the new preliminary syllabus (for 2018), the new HSC (for 2019) and pedagogy to support successful depth studies. #BEESSST17

**May 27**

## **Meet the Markers of the 2016 HSC Science Exams – University of NSW**

Endorsed by the NSW Education Standards Authority (NESA), MTM 2017 will provide teachers with the opportunity to gain valuable insight into the setting of HSC examinations, as well as the marking processes and implementation of the HSC marking guidelines. Program and online registration now open #MeetTheMarkers

**June 23**

## **Physics Teachers Conference - University of Technology Sydney**

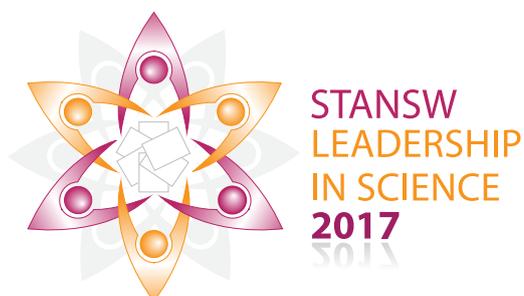

STANSW continues to support the teaching of Physics from years 7 to 12, with a range of workshops for beginner to experienced teachers. Collaborate, learn and network with colleagues from across the state. Bring your questions and your ideas so that everyone can improve their teaching skills. Experienced HSC teachers and markers will pass on techniques, stories and pedagogical advice on how to improve the teaching of Physics. In 2017 the focus will be around implementation of the new preliminary syllabus (for 2018), the new HSC (for 2019) and pedagogy to support successful depth studies. #STAPhys17

**July 28**

## **Chemistry Teachers Conference – Macquarie University**

STANSW continues to respond to requests for subject specific professional learning events. The program in 2017 will offer a mixture of seminars and workshops on Chemistry pedagogy. Join with like-minded Chemistry teachers for an inspiring day of discussion, networking and sharing. In 2017 the focus will be around implementation of the new preliminary syllabus (for 2018), the new HSC (for 2019) and pedagogy to support successful depth studies. #STACHem17

**August 4 and November 17**

## **STANSW Leadership in Science (K-12) Course 2017**

If you've been teaching for several years, you have achieved 'proficiency' and you want to move on, the STANSW Leadership in Science Course is for you:

- Learn how to make the professional standards work for you.
- Start gathering evidence that can be used to achieve accreditation at Highly Accomplished Level.
- Form a coaching relationship with other teachers at similar stages of career development. #LISC2017

STANSW is a NSW Educational Standards Authority (NESA) registered provider of professional development for the maintenance of accreditation at Proficient Teacher and also provide courses at Highly Accomplished and Lead Levels through the umbrella endorsement of the Professional Teachers' Council NSW (PTCNSW)
