Showcase your excursion opportunities to science educators across New South Wales.

Since its establishment in 1951, 75 years ago, the Science Teachers' Association of NSW (STANSW) has been dedicated to fostering excellence in science education in New South Wales. It is the leading representative, not-for-profit organisation for science teachers in NSW, bringing together Primary and Secondary teachers across all sectors, offering support, advocacy, professional development and guidance for teachers of science.

In addition to championing the passion of dedicated science educators in our Council and committees who generously volunteer their time to lead the association, STANSW proactively provides a robust support network. Our professional learning events are designed to enhance the skills and knowledge of the science teaching community.

On our 2027 events and professional learning schedule, we'll be offering teacher excursions - opportunities for teachers to explore potential excursion locations. It's also a chance for organisations operating in the education sector to connect with teachers seeking science-related experiences to support their science teaching and delivery of the syllabus.

We invite interested venues, museums and zoos to partner with us on a contra basis. STANSW will invite teacher members to attend a session at your location, allowing them to learn more about what's on offer, and if it's suitable for a future student excursion. You can design the session as you see fit for a science-teaching audience, and you will have access to the attendee list of science teachers. Complete the expression of interest form here.
